

Important Notes About BBM 479, BBM 480 project courses:

- BBM479 Design Project I and BBM480 Design Project II courses have been added to the curriculum by year 2020-2021 fall semester. These courses are compulsory for all students.
- Old project courses (BBM419, BBM420, BBM 429, BBM 430) have been removed from the curriculum.
- BBM102 and 104 are pre-requisite courses for BBM 479.
- BBM479 is the pre-requisite course for BBM 480. In other words, it is not possible to take BBM480 without passing BBM479.
- BBM419 is equivalent to BBM479 and BBM480 together. Therefore, students who have passed BBM419 course are exempt from BBM479 and BBM480.

The Changes about Occupational Health and Safety courses:

- As of 2017-2018 fall term, HAS222 Occupational Health and Safety I and HAS223 Occupational Health and Safety II courses have been compulsory in the 3rd and 4th semester curriculum.
- However, as of 2019-2020 fall term, HAS222 and HAS 223 courses have been removed from the curriculum. Instead of HAS 222 and HAS 223 courses, MUH 103 and MUH 104 courses have been added to the curriculum as equivalent compulsory courses.
- MÜH 103 is equivalent to HAS 222. MÜH 104 is equivalent to HAS 223.
- All students enrolled in the first semester in or after 2015-2016 fall semester must take HAS 222 and HAS 223. If they did not, they must take MUH 103 and MUH 104 courses. In other words, HAS 222/223 or MUH 103/104 courses are compulsory for these students.
- Students enrolled the first semester before 2015-2016 fall semester are not required to take HAS 222/223 or MUH 103/104 courses.

The Changes about BBM 384 Software Engineering Lab. course:

- BBM 487 Software Engineering Lab. Elective course has been removed from the curriculum. Instead of this course, BBM 384 Software Engineering Lab. course has been added as a compulsory course to the sixth semester curriculum.
- For the students enrolled in the first semester in or after 2017-2018 fall semester, BBM 384 Software Engineering Lab. course is compulsory.
- For the students enrolled in the first semester before 2017-2018 fall semester, BBM 384 Software Engineering Lab. is an elective course. If taken, BBM384 is considered as a technical elective laboratory for these students.

Important Notes About SEC coded courses:

- As of 2017-2018 fall semester, a student can take up to 3 SEC coded elective courses during the undergraduate education by a decision of the university senate.
- If a student has taken 3 courses from SEC-coded courses, he/she can take elective courses offered by other departments (Economics, Business Administration, Psychology, Spanish, etc.) to complete remaining elective course credits.

The Changes about FiZ 103, FiZ104 and BBM 105 courses:

- FiZ103 Physics Lab I and FiZ104 Physics Lab II courses have been removed from the curriculum. Instead of these courses, FiZ117 General Physics Laboratory course has been added to the curriculum as a compulsory course.
- FiZ103 and FiZ104 courses are equivalent of FiZ117 together.
- Students who are successful in both FiZ103 and FiZ104 courses will be exempted from FiZ117 course.
- Students who have failed one of the FiZ103 and FiZ104 courses are required to take FiZ117.
- BBM105 Introduction to Computer Engineering course has been added to the curriculum of the first semester as a compulsory course. BBM 105 course will be compulsory for the students enrolled to the department in or after 2017-2018 fall semester.
- Students who fail both FiZ103 and FiZ104 courses or who have not taken both courses must complete the remaining compulsory credit load by taking BBM105 and FiZ117 courses together.
